Gas Shock Installation Recommendations -	5-7

Please fully read and understand these instructions before starting work, and use safe working practices, procedures and safety equipment when working on the vehicle.

Please keep all packing materials should you need to exchange or return this kit. There is a minimum restocking fee of 15%, the fee is higher if parts have been modified or installed. The refund given is based on the condition of parts returned. If returning, the package must be re-packed tightly so that no parts “bounce” around and crash with each other or the side of the box. Poor re-packing may affect the condition of the parts, parts damaged in shipping due to poor packing will reduce the refund. Also, most shipping services don’t reimburse damage if the shipment was poorly packed.
