

# Hinge Mount Plate Installation Recommendations

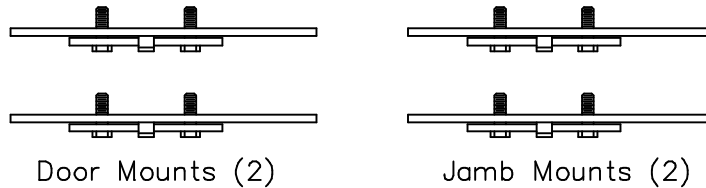

These Hinge Mount Plate instructions apply only if the entire "1B-4" mount kit was purchased.

## Warning:

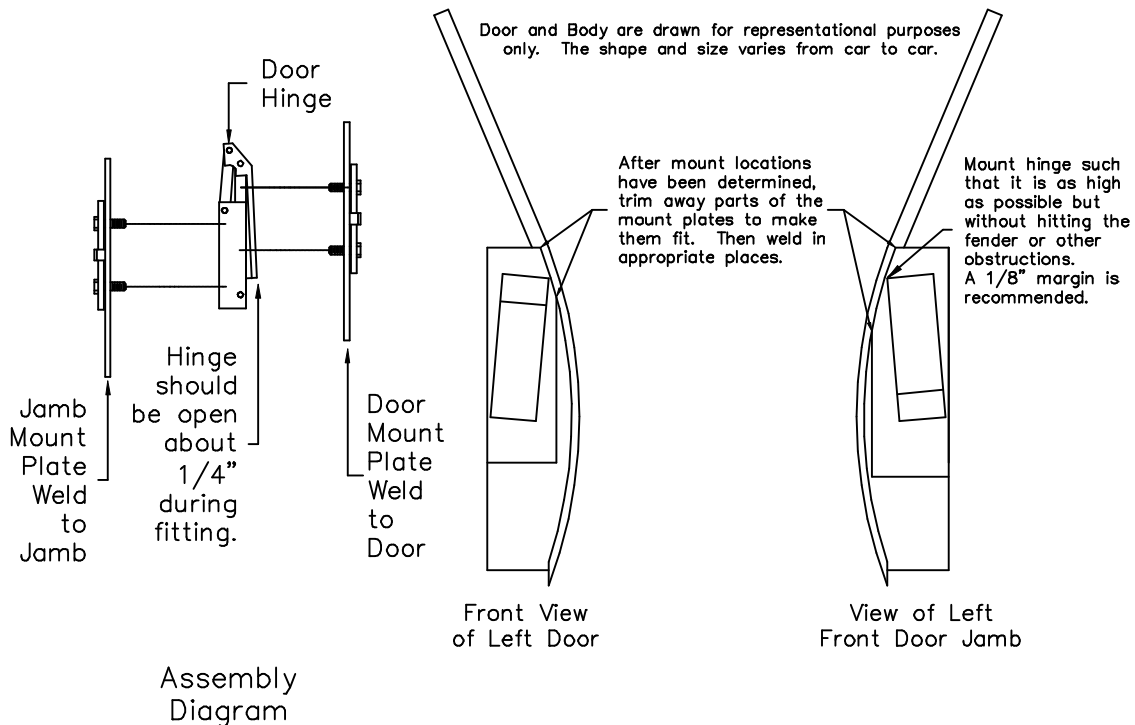

Read through all provided paperwork before beginning. Use all standard safety protocols and equipment. A mishap in construction and improper construction can cause damage and injury.

## Included:

Two pairs of backing plates are provided in a two door kit. The Jamb Pillar and Door Mount plates are intended to be cut to fit the application. Also, eight stainless steel washers and eight "nylock" nuts are included in a full kit.

The Jamb Mounts are the pair with the longest bolts.

## Tips:

The included mount plates are intended to be custom fit to the application and welded in. Tackwelding is suggested until all the mount angles are adjusted. See the "Door Hinge Installation Recommendations" sheet for considerations on setting the angles. When welding, take care to protect the hinges and interior parts.

## Reversability:

See page 2 for instructions on making this operation reversible.
